

Standup and be seen.

The Maxibit Standup is a unique portable literature stand that goes wherever you go. Packed neatly in a rugged aluminum case, Standup can be taken to tradeshow, conventions, malls, meetings and more. Standup unfolds in seconds with a single movement and locks itself into position. You can place literature on six angled surfaces, three on the front and three on the back for maximum exposure.

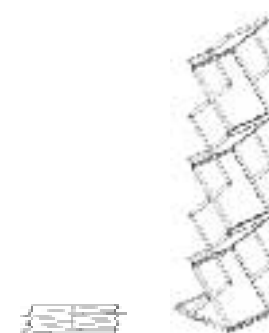

Tough and durable, yet light and attractive. Standup is constructed from high-grade aluminum for a superior strength-to-weight ratio. It comes with six clear acrylic panels for attractive brochure placement and is finished in brilliant titanium for an understated hi-tech appearance. The complete stand weighs just 12 lbs.

Tall and sturdy. Standup smoothly unfolds to a height of 56 inches to give your literature maximum visibility. Standup's flat base keeps it standing straight and sturdy, even in unusually high traffic areas.

Sheer value. Standup offers quality and convenience without breaking the bank. It can be used over and over again without the usual wear-and-tear and can be accessorized with custom panels for a dazzling new look. Simply put, Standup will never let you down.
