

STEP 1: GETTING STARTED

Begin by removing the parts from the carry case and placing them on a clean flat surface. Assemble the Poles (1) together by inserting the Top Pole, which is the one with the smallest diameter, into the Middle Pole. Then insert the Bottom Pole into the Middle Pole.

STEP 2: GET PUSHY

Carefully insert the top end of the smallest diameter Pole into the black pole pocket of your banner. Push the Pole as far as it will go until it hits the end of the pole pocket.

Note: Do not forcefully push the pole or it may become damaged.

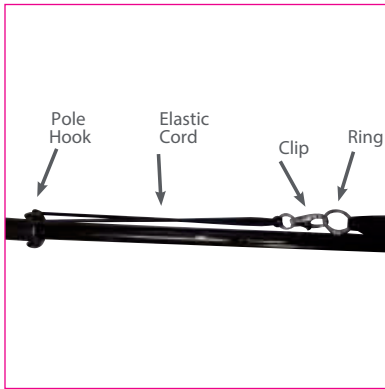

STEP 3: CONNECT RING

Remove the Ring from the Clip and connect it to the nylon loop on the bottom end of your banner's pole pocket.

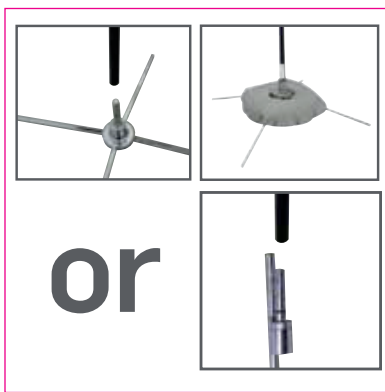

STEP 4: SECURE RING

Put one end of the Elastic Cord through the Clip's ring and tie a knot in the Elastic Cord.

STEP 5: FINAL STEPS

Attach the Elastic Cord to the hook on the bottom of the pole and the Clip to the Ring.

STEP 6: ATTACH BASE

For Cross Base extend the legs outward (fill and add Water Ballast for extra stability) then add Pole.

For Spike Base attach to pole and push spike into ground.

STEP 7: RAISE IT UP

Place your Feather Flag where you will have maximum visibility.
