

STEP 1 - GET YOUR DUCKS IN A ROW

Assemble the first two tapered rods, starting with the thinnest rod and then adding the next size, making sure they fit snugly together.

STEP 2 - LINE THEM UP

Insert these 2 rods into the sleeve on the side of the banners.

STEP 3 - START GETTING PUSHY

Continue to add the next 2 metal rods until the top rod has been pushed all the way to the end of the sleeve.

Tip: It is important to ensure the rods are positioned right to the end of the sleeve.

STEP 4 - TIE IT OFF

Bring the bungee string through the grommets on the bottom of the sleeves.

Bring it down and adjust the tension of the banner. Secure the metal spring clip on the bottom of the banner to the movable anchor point on the bottom rod. Tie string around the clip to secure the banner.

Tip: If the banner is too loose or too tight, adjust the anchor point up or down accordingly.

STEP 5: ATTACH BASE

For Cross Base extend the legs outward (fill and add Water Ballast for extra stability) then add Pole.

For Spike Base attach to pole and push spike into ground.
