## LIGHTWEIGHT AND PORTABLE TRADESHOW EXHIBITS

Alluring shapes and bold expressions showcase The Portables Tension Fabric exhibit structures. With a multitude of shapes and forms, versatility is a cornerstone of these exhibits.

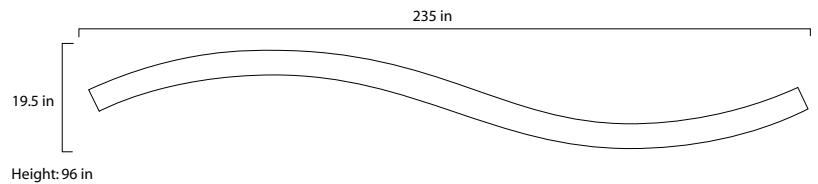

With Tension Fabric exhibit structures it is now possible to have the perfect balance of size and weight. And due to its strong engineering, growing the size of the exhibit, does not impact set-up and dismantle time to any large degree.

The beauty of a Tension Fabric exhibit is the minimal weight of the structure. The structure disassembles to fit into a convenient nylon case. After all with your beautiful vivid graphics stealing the show, the structure is simply there as background support.

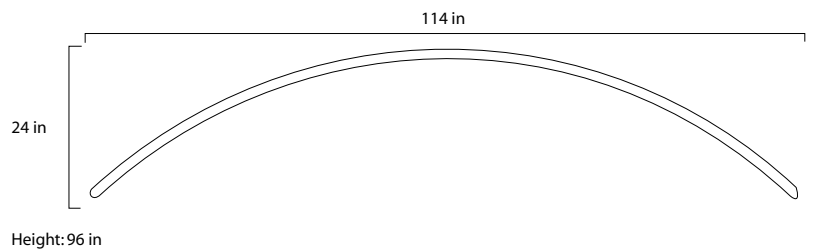

Some of the unique shapes that can be created with The Portables Tension Fabric exhibit structures:

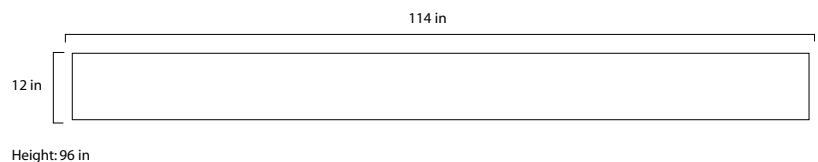

### WAVE

### CRESCENT WALL

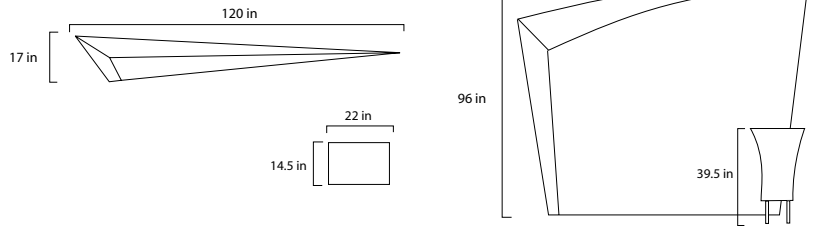

### WISP WALL 10' (shown) / 20'

## KEYSTONE

## CONTOUR

## WIND CONE

There are times when your event program demands a vibrant graphic, extreme functionality but also ease of transport. In the past achieving these objectives would have far exceeded most exhibit budgets. With the Wind Cone Tension Fabric structure all your wishes come true.

Wind Cone sets up in a matter of minutes, easily handles a plasma screen and with the supporting counter has the ability to showcase your latest product offering. With its stunning visual presence your message will not go unnoticed.

### DIMENSIONS

Hardware	W 52.5" (top) 27" (bottom)	H 116"	D 27.5"
Weight	150 lbs

## ABOUT TENSION FABRIC

Tension Fabric utilizes a dye-sublimation process to create a vibrant, permanent image. This image is literally heat-pressed from transfer paper, onto fabric with stretch qualities similar to Lycra®. The creation of Tension Fabric structures is a true coming together of science and art. Knowing what size and proportions to sublimate the image so that it is visually correct when expanded is where skill and experience play a major role

## THE ADVANTAGES OF TENSION FABRIC STRUCTURES:

- Lightweight – reducing freight and drayage charges
- Easy to set-up – reducing show labour charges
- Versatile – able to create compound curves at affordable prices
- Vibrant – beautiful vivid images can be sublimated onto fabric
- Durable – fabric panels are washable if the need arises
- Seamless – large graphic walls can be created without any visible seams
- Affordable – displays and exhibits are surprisingly cost-effective

## HANGING TENSION FABRIC SIGNS

How do you identify yourself to your prospects in a crowded tradeshow environment? Where the show permits, a Hanging Tension Fabric sign allows you to showcase your brand while still keeping your budget in mind. With a number of configurations and shapes, bringing your corporate branding to life has never been easier.
