The original.

Let your story unfold dramatically with the Original 8, the world's first folding-frame display system. For more than twenty years, the Original 8 has given exhibitors across the world an ideal alternative to heavy and costly custom displays, and is now the exhibition industry standard. Though today many similar systems are available, none offers all the features and benefits of the true original.

Dash and carry. Take your show on the road and straight into the exhibition area! A standard-size Original 8 display fits into an over-the-shoulder nylon carrying case that can be easily transported to an event in the trunk of most cars.

Deliver a strong message. Make a long-lasting impression with the world's longest-lasting display design. The Original 8 frame is made of anodized high-grade aircraft aluminum for superior strength and durability. Its inherently strong rectangular frames make the system almost impossible to damage under normal usage. And since each display panel is inserted into its own frame, panels remain rigid and well protected.

Stays in great shape. Customize your display on-site according to your needs. The Original 8 system is engineered to be completely modular, and can be expanded, reduced or reconfigured, all in the field. The system's complete flexibility is made possible with patented stainless steel 360 degree hinges and auto-locking device. Create a show-stopping back wall, or add compatible accessories like load-bearing shelves or tables. Top it off with lights or turn it into an impressive tower... the possibilities are limitless.

Two sides to every story. The Original 8 system gives you two displays for the price of one! Each frame features twin channels which allow for insertion of both a front and back panel. A double-sided display provides double the impact and attracts the attention of prospects whether they're coming or going. Each sturdy frame also features a ball bearing release slider for instant panel replacement without special tools.

A display that rises to the occasion. The Original 8 is fast on its feet on virtually any surface! The system has adjustable feet that allow your display to be steadied properly on uneven show floors. The easily adjustable feet also give extra clearance at the bottom of the display should light or extension cords need to pass underneath.

Slider and twin channels allow you to instantly replace front and back panels

Patented interlocking clicks lock system into place

Patented 360° hinges allow for unlimited configurations

Adjustable feet for uneven surfaces and extra clearance
