PRINTED IN CANADA

## A seamless beauty.

Image is everything, especially when you're face-to-face with your customer. The Network pop up system has everything you need to project a professional image for your product, promotion or service. Its unique, smoothly curved design ensures customers won't see any lines or wrinkles on the face of your display, just your image. Beautifully and seamlessly.

**Portability plus a podium.** The entire Network system - expandable frame, magnetic infills, display panels, lights, cords and podium kit - fits neatly into a single, portable All-In-One Case. Inside, separate compartments simplify storage and cushion metal hardware from panels and other contents. The case then transforms into your presentation podium, adding value, impact and message area to your overall display.

**Muscular frame for a tough workout.** For lightness, strength and rigidity few systems can match Network. Its expandable frame is made of anodized aircraft aluminum - a material with an excellent strength-to-weight ratio. And with its proven durability, Network is virtually impossible to break with normal use.

**Change and grow at every show.** Add inches to your height or extra sections to your width! Network is designed so that the frame can be expanded, reduced or reconfigured on the spot without tools or tinkering. Change it from a flat to a curve, to an S-curve. Or, build it into a breath-taking arch that towers above. The opportunities are endless!

**Ingeniously simple to set up.** Network's universal infills are designed to be one section high. This means any infill can fit on any section of the frame, making set up much faster and simpler than most other systems. As well, the infills butt squarely together on the frame, allowing them to support substantial shelving by transferring the weight to the floor.

**Works well on every level.** With Network, your display will always have its feet planted firmly on the ground. Network has adjustable feet that allow your display to be steadied properly on uneven show floors. The adjustable feet also provide extra clearance at the bottom of the display should light or extension cords need to pass underneath.

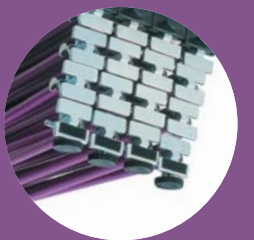

**Attract customers like a magnet.** When your panel meets the infill, opposites really do attract. Network is "mag-to-mag", meaning the infills and panels both have polarized opposite magnetic strips. These magnetic strips are designed to lock together, guaranteeing a seamless, perfectly aligned image every time.

Compact, lightweight system expands into a full visual display

Polarized magnetic strips for seamless precision

Adjustable feet for uneven surfaces and extra clearance

Entire display fits neatly into a single All-In-One Case
